

## NYC Area Companies to Explore Network Security Solutions at Manhattan Cyber Security Summit

*eMazzanti Technologies partners with network security provider, WatchGuard Technologies, to demonstrate IT security at top industry event*

Hoboken, New Jersey -- (Cision) September 15, 2016 – eMazzanti Technologies, a New York City area IT security expert, computer consultant, and 5X WatchGuard Partner of the Year, announced today that it will be exhibiting at the 2016 Cyber Security Summit in tandem with WatchGuard Technologies, a [network security industry leader](#).

The Cyber Security Summit, an influential conference series sponsored by Darktrace, connects senior business leaders responsible for protecting their companies' critical IT infrastructures with innovative technology providers and prominent information security experts.

The New York 2015 Cyber Security Summit will be held September 21, 2016, at the Grand Hyatt New York, 109 E 42nd St.

"Ransomware, and other threats entering through encrypted web traffic increasingly challenge the security of business networks," stated Carl Mazzanti, CEO, eMazzanti Technologies. "New York City area companies seeking to mitigate these risks can find expert guidance at the Cyber Security Summit."

The Cyber Security Summit is intended to appeal to senior executives who don't have the time to travel to the large cyber trade shows. Organizers bring the cyber summit to them in the nation's top cities. Events are one day only at first class hotels, rather than convention centers.

### **Network Management Services**

eMazzanti Technologies will be on hand at the summit to discuss the company's eCare Network Management Services, a comprehensive IT security, support, implementation and maintenance solution available for a flat fee per asset per month.

eCare solutions efficiently leverage existing hardware and software investments to provide heightened security, increased speed and efficiency in day-to-day operations, and faster and more accurate troubleshooting, restoration and repair.

### **High Bandwidth Security Solutions**

Of particular interest to attendees will be eMazzanti's eCare [network security solutions](#) that are specifically engineered for mid-sized and distributed enterprises struggling to effectively and affordably secure networks in the face of explosive growth in bandwidth rates, [encrypted traffic](#), video use, and connection speeds.
